Course : **MCA**, Computer Application, 2024  
Email : anurup.biswas@stu.adamasuniversity.ac.in  
Mobile : 9382037487  
CGPA : 8.7

**ACADEMIC DETAILS**

COURSE	SPECIALIZATION	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
UG	Computer Application	Kharagpur College	Vidyasagar University	79.31 %	2022
CLASS XII		Atul Moni Poly technic H.S. School	West Bengal Council of Higher Secondary Education (WBCHSE)	75.4 %	2019
CLASS X		Atul Moni Poly technic H.S. School	West Bengal Board of Secondary Education (WBBSE)	53.43 %	2017

Subjects / Electives	DBMS, OPERATING SYSTEM
Technical Proficiency	Desktop Application Development, Web Development, Core Java, Python

**SUMMER INTERNSHIP / WORK EXPERIENCE**

**PROJECTS**

<b>BMI CALCULATOR - HTML, CSS AND JAVASCRIPT</b> Simple BMI(Body Mass Index) calculator.This is my private project	<b>Aug 2023 - Aug 2023</b>
<b>Sentiment Detection of Twitter user through AI &amp; ML - Web Development using Python(Flask)</b> This is a web app made using Python and Flask Framework. It has a registration system and a dashboard. Users can enter keywords to retrieve live Twitter text based on the keyword, and analyze it for customer feelings and sentiments. This data can be visualized in a graph. This project, in particular, mines data using a popular "Tweepy" API. Tweepy API connects to Twitter in real-time and gathers metadata along with the text from the Twitter platform. To segregate customer sentiment on a scale of -1 to 1, where -1 represents a strong negative sentimentality towards the keyword(s), and 1 represents a strongly positive reaction.	<b>Aug 2023 - Present</b>
<b>Doc-Appointment-system - MERN STACK</b> This is Doc-Appointment-system project using mern stack. Where there are two dashboards one for users and another for admin. Both doctor and patient can login to the user dashboard. Then both the user and the doctor can fill up the form. In which form the user can tell his details and his problem. And the doctor can also tell his details r his specialization. After that, the admin can collect all the data and decide which doctor is allocated for which patient. Then the patient will check the doctor's ability and send the request to the admin. Then admin will see which doctor is free then admin will approve the doctor for the patient.	<b>May 2023 - Jul 2023</b>
<b>Airline Ticket Booking System - Desktop Base Application using Java</b> The main objective of the our Airlines Reservation System is to manage the details of Airline Ticket, Flights, Customer, Booking Counter, Venders. It manages all the information about Airlines Ticket, Booking, Venders, Airlines Ticket. The project is totally built at administrative end thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Airlines Ticket, Flights, Booking, Customer. It tracks all the details about the Customer, Cooking Counter, Venders.	<b>Feb 2022 - Apr 2022</b>
